

MED3000 and Quippe Integration as featured on HERTalk

“I haven't seen any product with anything similar and I am convinced that it's the way of the future.”

HERTalk by Inga

Yes folks, that is my brand new iPad. I was one of Medicomp's lucky winners. And yes, Medicomp was our amazing HIRSTalkapalooza sponsor and they also made me the proud owner of a cool toy. Regardless, their new Quippe is a serious game changer. I looked at the technology that is embedded into MED3000's Integreat product and was amazed. Today I saw Medicomp demonstrate it further and I am convinced that every EMR vendor needs to check out this technology. **I haven't seen any product with anything similar and I am convinced that it's the way of the future.** I realize that I am such raving without giving details, but I will have to go back to that another time.
